[PDF] Speed Of Light Wikipedia

The speed of light in vacuum, commonly denoted c , is a universal physical constant important in many areas of physics. its exact value is $299,792,458$ metres per second (approximately $300,000$ km/s ($186,000$ mi/s)). it is exact because by international agreement a metre is defined to be the length of the path travelled by ...

[PDF] History Of The Free Will Problem Information Philosopher

From its earliest beginnings, the problem of "free will" has been intimately connected with the question of moral responsibility. most of the ancient thinkers on the problem were trying to show that we humans have control over our decisions, that our actions "depend on us", and that they are not pre-determined by fate, by arbitrary gods, by ...
